

INDEX OF TABLES AND FIGURES

TABLES

HUNGARIAN LABOUR MARKET

Table 1: Evolution of the number of employed by certain important aspects	23
Table 2: The number of persons who reported a foreign workplace in the labour force survey of the CSO by target country, 2017	24
Table 3: Number and employment rate of Hungarians living in other EU Member States	25
Table 4: Evolution of the number of the employed and the potential labour reserve, 2010–2017	29
Table 5: Net and real earnings calculated with the family tax relief, 2017	38

IN FOCUS

Table 2.1.1: The contribution of public works, employment abroad and population decline to the increase in the employment rate between 2000 and the first quarter of 2017	55
Table 3.2.1: Average annual income levels for women and men in geographic areas of the European Union (in thousands of Euros at 2015 prices, adjusted for purchasing power parity; 25–60-year-olds commanding personal income)	77
Table 4.2.1: Dimensions of vulnerability among men and women ...	92
Table 4.3.1: The impact of restrictions on access to abortion in 1974 on the share of children born with birth defects	97
Table 5.1.1: Difference in the share of educational attainment between women and men in younger age groups, 2017	99
Table 5.2.1: Gender gaps in test scores (boys-girls) and the characteristics of the education system in European countries, 2015	107
Table 5.3.1: Employment chances of women compared to men	112
Table 5.4.1: Application decision in higher education ranking	116
Table 5.4.2: Higher education applications	117
Table 5.4.3: Application decisions of first ranked options	118
Table 5.4.4: The simulated impact of the alternative higher education policy. Counterfactual analysis: the	

impact of open access to STEM programs	119
Table 7.1: Average differences in health indicators by employment status, controlling for demographic and socio-economic factors, among women aged 50–59 in Hungary ..	145
Table 7.2: Differences in employment rates between countries, controlling for age, qualification, type of settlement and the distribution of health, among women aged 50–59	145
Table 8.1.1: Background characteristics and fertility of women	152
Table 8.1.2: The relationship between teenage motherhood and the outcome variables	154
Table 8.2.1: The impact of the availability of child-care services on the labour supply of mothers (β) and the most relevant institutional characteristics	157
Table 10.1: Gender wage gap estimates, private sector	174
Table 11.1.1: The monthly amount of the family allowance per child, since 2008 (HUF)	178
Table 11.1.2: The monthly amount of family tax credit per child, 2011–2018 (HUF)	180
Table 12.1: The number and age of females taking old-age retirement	192
Table 12.2: Data of Female40, 2013	193
Table 12.3: Relative benefits of Females 40, retiring in 2013, in terms of nationwide net age	193
Table 12.4: Condensed contingency table on females retiring in 2016, Retirement age=63	194
Table 12.5: Condensed contingency table on females retiring in 2016, Female40	194
Table 12.6: Three-class aggregation: partial statistics	195
Table 12.7: Averages for the three classes	195
POLICY TOOLS	
Table F1: Expenditures and revenues of the tight section of employment policy in the national budget, 2012–2018 (m HUF)	207
STATISTICAL DATA	
Table 1.1: Basic economic indicators	211

Table 2.1: Population	213
Table 2.2: Population by age groups, in thousands	213
Table 2.3: Male population by age groups, in thousands	215
Table 2.4: Female population by age groups, in thousands	215
Table 3.1: Labour force participation of the population over 14 years, in thousands	216
Table 3.2: Labour force participation of the population over 14 years, males, in thousands	217
Table 3.3: Labour force participation of the population over 14 years, females, in thousands	218
Table 3.4: Labour force participation of the population over 14 years, per cent	219
Table 3.5: Labour force participation of the population over 14 years, males, per cent	220
Table 3.6: Labour force participation of the population over 14 years, females, per cent	221
Table 3.7: Population aged 15–64 by labour market status (self-categorised), in thousands	222
